MECHANICAL ENGINEERS/PROJECT MANAGERS

QUALIFICATIONS

Cool Breeze, Air conditioning and Refrigeration is currently looking for Mechanical Project Manager. A candidate with a sound knowledge and proven experience of working with Boilers, Chillers, Mortuary freezers, cold rooms, Air conditioning etc. A candidate who poses or have a sound knowledge and experience on HVAC will be considered for the post.

RESPONSIBILITY.

- Lead the HVAC project coordination team to increased throughput by working directly with individual project managers, sub-contractors, utility companies, and local building departments to document process and find ways to improve.
- Provide constant detailed visibility of critical project Milestones, costs, and timelines (Project planning) of all active projects.
- Facilitate roll out of new process or products in accordance with Cool breeze, Air conditioning and Refrigeration company goals.
- Manage individual team member expectations and performance.
- Constant process development to make sure that cool breeze is always finding ways to improve the customer experience and reduce cost.
- Ability to use photos and construction plans to develop project scope of work and cost.
- Ensure projects are moving through in a timely manner by fulfilling defined service level agreements (SLA).
- Works cross functional with Cool Breeze, Air conditioning and Refrigeration to ensure client needs and internal deadlines are met.
- Technical construction decisions to be made daily.
- Work closely with project managers, Cool Breeze, Air conditioning and Refrigeration regional operations, approved sub-contractors vendors, and in house electricians.
- Perform additional duties as assigned and directed.

REQUIREMENTS.

- Bachelor degree or relevant qualifications.
- 10 Years of experience in HVAC industry.
- Driver's License.
